

Plug and Play Installation
Eliminate 3.5" Floppy Disk
720K/1.44MB IBM Format
Compatible with Most CNCs
Requires No Firmware Changes
Easy to Use and Operate

Shop Floor Automations 3.5" floppy disk drive to USB flash drive reader converter will replace your existing floppy drive with an independently operated USB flash drive reader. No additional changes to your system are needed besides removing the existing drive and replacing it with this drive.

Easy installation and no system configuration or debugging required. The drive emulates your existing floppy drive to act as if the floppy drive was never removed. This drive should replace most any existing 720k/1.44MB capacity IBM format floppy drive. Also 28 or 32 pin ribbon cables systems available and will connect to your existing power and data cables. Not only will this device work in PCs but, it will also work in CNC machinery (Haas, Centroid, Mazak, Okuma, Miltronics, Fadal, Robots, Flame Cutters, Greco Disks) or devices that still use floppy drives. This device completely replaces the universal floppy drive of computerized system.
